BatteryMINDer®

For optimal Concorde® battery maintenance

Aircraft Battery Accessories • BatteryMINDer® Model 244CEC1-AA-S5

Concorde® Battery Corporation's engineering department, along with VDC (makers of the BatteryMINDer®), developed the new **244CEC1-AA-S5 Charger/Maintainer/Desulfator** with optimal charge and maintenance voltages for sealed AGM RG® Series batteries. Concorde conducted extensive testing to determine the ideal float voltage for optimal battery performance with extended battery life.

Maintaining batteries in a good state of charge is crucial for airworthiness and optimum performance. **BatteryMINDer® Model 244CEC1-AA-S5** is an intuitive, Plug & Run, 4-amp, 24-volt, temperature compensated maintainer.

- Optimized to work with Concorde's sealed AGM RG® Series 24-volt lead acid aircraft batteries
- Will not overcharge at any temperature over any time frame
- Charges battery completely and maintains full charge
- Built in temperature sensor compensates charging based on battery and environmental temperatures
- Built in temperature compensation prevents over- or undercharging
- Extremely efficient, low operating cost
- Indicator lights for power, connection, fault, battery condition, and charge status

Included accessories:

- 6' AC cord, 6' DC cord
- 2' fused battery clip cord set with quick connector
- Ambient temperature sensor

If you are interested and would like more information, please give us a call at **1-800-645-1406**.
